# ABOUT THE COMPANY

Blauberg Ventilation is a part of the international group of companies Blauberg Group.

The Group headquarters as well as the R&D center and the quality control laboratory are located in Munich, Germany.

The Group is represented by a great number of offices and companies all over the world, ensuring timely supply and servicing.

## MANUFACTURING FACILITIES

- Munich, Germany
- Trier, Germany
- Poznań, Poland
- Elk, Poland
- Tata, Hungary
- Kyiv, Ukraine
- Moscow, Russia

**100+**  
OVER  
100 MILLION  
FANS MADE  
BY US

**110**  
COUNTRIES  
WHERE YOU  
CAN BUY  
OUR PRODUCTS

**3500**  
EMPLOYEES  
WORLDWIDE

**Blauberg Group** develops ventilation technology which complies with European and international standards and requirements specific to efficiency, reliability and safety.

Continuous improvement of the entire process flow, stringent product quality assurance at each production step, active implementation of innovative technology and consistent improvement of consumer appeal of the products were the key elements of the group's strategy of earning international recognition and making the Blauberg Group brands stand for uncompromising quality.

### Features

Supply and extract ventilation systems installed in various premises requiring low noise level.

Ventilation air ducts requiring high pressure, powerful air flow and low noise level.

Compatible with Ø 100 up to 315 mm round air ducts.

The casing is made of low flammable polypropylene.

Ventilation unit with terminal box fitted with a lead and plug and 2 speed exterior switch. Can be turned to any position.

Special design of the casing permits easy dismantling of the impeller and motor block for fan servicing without dismantling the air duct.

Complies to:  

- AZ/NZS 60335.2.80:2016+A1
- AZ/NZS 60335.1:2020

### Features

Inline fans for supply and exhaust ventilation of various commercial and industrial premises requiring powerful air flow.

The fans are compatible with Ø 355 and 400 mm air ducts.

New product combines wide capabilities and high performance features of axial and centrifugal fans, providing powerful air flow.

The fan casing is made of polymer and reinforced with a metal housing. Due to the conically shaped polymer impeller with specially profiled blades, the air stream circular velocity increases, which results in higher air flow and pressure, as compared to characteristics of standard axial fans.

The specially designed diffuser, impeller and airflow rectifier at the fan outlet provide smooth air flow distribution and enable the best combination of high capacity, powerful pressure and low noise. The fan casing is equipped with an airtight terminal box fitted with a lead and plug and 3 speed exterior switch.

Complies to:

- AZ/NZS 60335.2.80:2016+A1
- AZ/NZS 60335.1:2020

## SOUND INSULATED INLINE MIXED FLOW FANS

up to **1920 m<sup>3</sup>/h**  
**533 l/s**

from **24 W**

from **23 dBA**

### Features

Supply and extract ventilation systems installed in various premises requiring low noise level.

For ventilation air ducts requiring high pressure, powerful air flow and low noise level.

Compatible with Ø 150 up to 315 mm air ducts.

The casing is made of polymer coated steel, internally filled with 50 mm mineral wool thermal- and sound-insulating layer.

Special inner perforation of the casing and sound insulating material are designed for wide frequency sound absorbing.

Mixed flow impeller made of high quality plastic.

The diffusor, the specially profiled impeller and directing vanes provide high performance and powerful pressure combined with low noise operation.

External airtight terminal box fitted with a lead and plug and 2 speed exterior switch.

Mounting brackets on the fan casing for mounting to the floor, to the wall or ceiling.

Complies to:

- AZ/NZS 60335.2.80:2016+A1
- AZ/NZS 60335.1:2020

# CENTRO

## INLINE CENTRIFUGAL FANS

### Features

Supply and extract ventilation systems installed in various premises requiring low noise level.

Compatible with Ø150 up to 315 mm round air ducts.

High quality durable plastic casing.

Aerodynamically shaped casing.

External airtight terminal box fitted with a lead and plug.

- Complies to:
- AZ/NZS 60335.2.80:2016+A1
  - AZ/NZS 60335.1:2020

# TUBO-F

## INLINE AXIAL FANS

up to  
**2500 m<sup>3</sup>/h**  
**695 l/s**

from  
**50 W**

from  
**50 dBA**

### Features

Combined supply and exhaust ventilation systems for various premises where high air flow at relatively low system resistance is required.

The fan casing and the impeller are made of polymer coated steel.

The fan casing sides have 30 mm deep corrugation

for convenient attachment to the air ducts.

The Tubo-F series fans feature an external terminal box mounted to the fan casing.

- Complies to:
- AZ/NZS 60335.2.80:2016+A1
- AZ/NZS 60335.1:2020

\* Compliant to the ErP-regulation (EC) 327/2011, the power consumption at optimum efficiency is < 125 W.

# DUCTO

## INLINE AXIAL FANS

up to  
**340 m<sup>3</sup>/h**  
**94 l/s**

from  
**7.5 W**

from  
**25 dBA**

### Features

Low noise axial inline fans for exhaust or supply ventilation with superior capacity up to 340 m<sup>3</sup>/h.

From low to medium air flow motion for short distances at low air resistance.

Compatible with ø 100, 125 and 150 mm air ducts.

The casing and the impeller are made of high quality durable plastic.

The models of Blauberg Ducto Series are equipped with

a single-phase motor and fitted with a lead and plug.

Specially designed mixed flow impeller profile ensures high air flow and low noise level.

The motor has thermal overheating protection for motor overload prevention.

Motor on special anti-vibration connectors.

Complies to:

- AZ/NZS 60335.2.80:2016+A1
- AZ/NZS 60335.1:2020
